1. ***File > Preferences > Keyboard Shortcuts***
2. Above the search bar on the right you'll see this icon Click on it. (*When hovered over it it says: Open keyboard shortcuts (JSON)*

1. Add this to the JSON settings:

```
{

  "key": "ctrl+shift+l",

  "command": "editor.action.insertSnippet",

  "when": "editorTextFocus",

  "args": {

    "snippet": "console.log('${TM_SELECTED_TEXT}$1')$2;"

  }

}
```

Pressing CTRL+SHIFT+L will output the console snippet. Also, if you already have text selected it will be put inside the log statement.
